The Manitoba/Winnipeg Community Revitalization Program

The Manitoba/Winnipeg Community Revitalization Program (M/WCRP) is a 50/50 cost-shared initiative developed between the Province of Manitoba and the City of Winnipeg.

The Program is designed to meet Plan Winnipeg's objectives by facilitating the improvement of living conditions (including social, physical and environmental) in older, deteriorating but potentially stable and predominantly residential neighbourhoods.

The M/WCRP Program provides a comprehensive approach in addressing the unique needs of each designated older neighbourhood by:

- involving neighbourhood residents in the decision making process, including participation in the development and implementation of a neighbourhood specific revitalization strategy;
- providing capital resources as well identifying and/or obtaining complementary funding from other sources to bring about planned improvements;
- providing the flexibility to deal with a broad spectrum of improvement possibilities, while responding to the requirements and priorities identified through neighbourhood level planning.

THE PROGRAM

The City of Winnipeg and Manitoba Urban Affairs designated the Glenwood area for revitalization through the MWCRP Program in 1992. Funding approval was provided in three phases with the Province and City each contributing $500,000 in 1993, $500,000 in 1994 and $500,000 in 1995 for a total program budget of $3 million

Overview

The main objective of the Manitoba/Winnipeg Community Revitalization Program (M/WCRP) is to enhance the physical environment of targeted older residential neighbourhoods, thereby improving the quality of life for its residents. Manitoba Urban Affairs and the City of Winnipeg designated the Glenwood neighbourhood for revitalization in 1992, and provided a total budget of $3.0 million on a 50/50 cost-shared basis.

Program funds were made available, based upon the guidelines of the M/WCRP Program for:

- Improving or constructing recreational facilities (playgrounds, athletic facilities, community centres, schoolyards, etc.)
- Improving or constructing social facilities (day cares, senior citizen centres, etc.)
- Improving municipal services (sidewalks, curbs, streetscaping, lighting, etc.)
- Involving local residents in planning improvements for the area (publicity, meetings etc.)
- Administration costs such as salaries and site office operations,
- Other identified community projects and initiatives.

Revitalization of the Glenwood neighbourhood was achieved through:

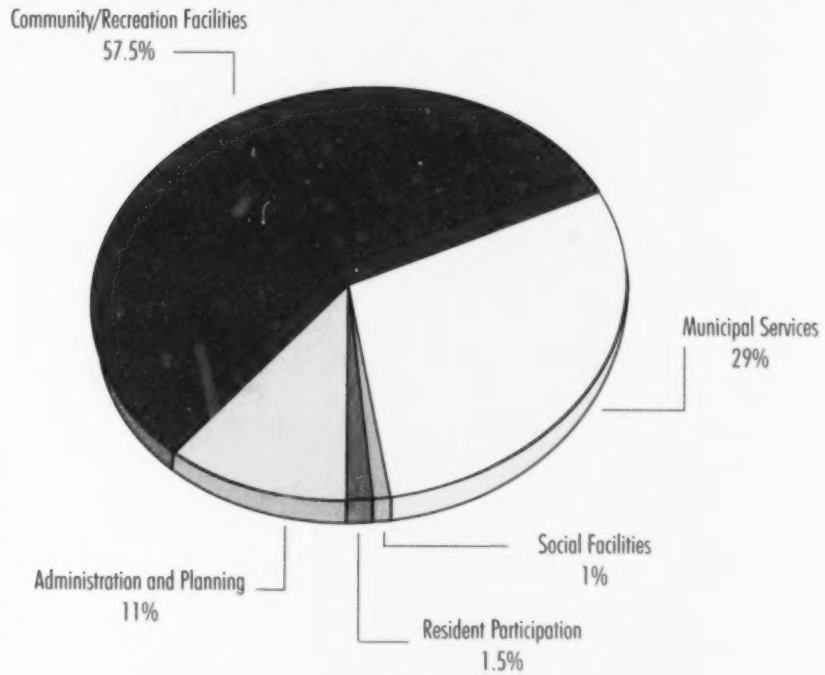
- The investment of $1.5 million by the Province of Manitoba (Urban Affairs) and $1.5 million by the City of Winnipeg.
- Involvement of residents and key neighbourhood stakeholders as full partners in the planning and decision-making processes respecting improvement project proposals.
- Development of a strategic planning document that outlined improvement actions that should be undertaken in response to identified neighbourhood issues.
- Development of strong and positive partnership between area residents, local organizations and the two levels of government.

The $3.0 million was allocated as follows:

Community/Recreation Facilities	$1,730,050.00
Municipal Services	869,550.00
Social Facilities	33,400.00
Resident Participation	40,000.00
Administration & Planning	327,000.00

The partnerships that were formed throughout the course of the M/WCRP became an important component in the successful implementation of many projects that could not have otherwise happened. Funding was levered from various sources, including the Manitoba Community Places Program, Manitoba Hydro, Manitoba Natural Resources (Fisheries Branch), Sustainable Development Innovations Fund, Manitoba Community Services Council, City of Winnipeg Capital, the City's Community Incentive Grant Program, Public Works Department, the Winnipeg Development Agreement (Federal Programs 13B and 14 and Provincial Program 12A), Ducks Unlimited, Le College de Saint-Boniface as well as an organization's own funds. Total complementary funding exceeded **$1.46 million.**

BUDGET BREAKDOWN

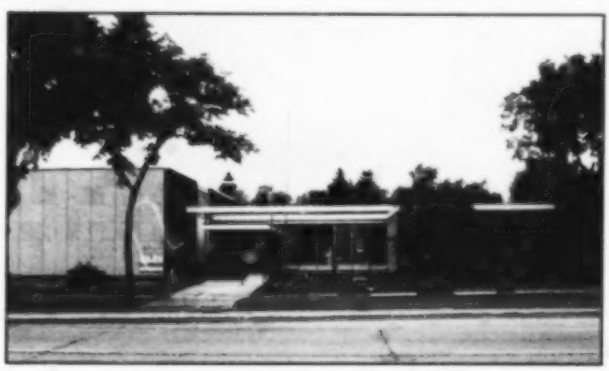


Administration

Staff from the City of Winnipeg's Neighbourhood Programs Division of the Community Services Department (now the Planning and Land Use Division of the Planning, Property and Development Department) were responsible for administering the Manitoba/Winnipeg Community Revitalization Program (M/WCRP) in Glenwood. Manitoba Urban Affairs was a full funding partner and monitored the program's progress. A Program site office opened in October 1995, at 604 St. Mary's Road. The site office provided space for Resident Committee and program-related meetings, and served as a contact point between area residents and the City administration that were responsible for delivery of the M/WCRP Program. The office, which operated with a Neighbourhood Planner, a Community Development Worker and a Clerk, remained at this location until March 1997, when staff moved to the centralized administrative office at 395 Main Street.

Staff were the data collectors, clearing agents and facilitators who assisted, promoted, identified and coordinated potential resources to achieve improvement in the neighbourhood. They provided liaison with community groups, city departments and provincial agencies, and were also responsible for the dissemination of Program information and literature throughout the Glenwood neighbourhood. This was achieved through the production and delivery of brochures, a door-to-door survey, interviews with newspaper media, the facilitation of round table, community and project-focused meetings, and through outreach work, including informal exchanges with individual residents and meetings with area organizations, agencies and institutions. The information gathered from all of these sources assisted in identifying neighbourhood issues and needs that, in turn, were incorporated into the Glenwood Community Revitalization Strategy document.

Throughout the project planning and implementation stages of the M/WCRP Program, strong and positive partnerships were realized with staff from other civic departments as well as social agencies and other levels of government (see Project Implementation section).



Resident Participation

Ensuring that area residents have the opportunity to provide input into the revitalization of their neighbourhood is a fundamental component of the Manitoba/Winnipeg Community Revitalization Program (M/WCRP).

Resident participation began in the Glenwood area in the winter of 1993 when public meetings were held to introduce the Program to the neighbourhood and a Residents' Committee was elected. The purpose of the Committee was for area residents to serve as advisors to Program staff in the development of improvement projects and initiatives. This involved identifying and prioritizing the needs of the neighbourhood, reviewing funding requests and making recommendations for funding. The Residents' Committee members also liaised with, and solicited information from, other residents.

The Residents' Committee met with Program staff on sixty-four occasions for regularly-scheduled meetings, and many more times, in fewer numbers, for purposes of project planning sessions and preparing for public meetings. Information was shared and a Community Revitalization Strategy was prepared which addressed neighbourhood concerns and identified potential projects that could be developed in order to achieve the revitalization of the area. Once the community approved the strategy, the Residents' Committee heard presentations from community groups and individuals and made funding recommendations regarding proposed revitalization projects.

The neighbourhood at large was kept informed about ongoing M/WCRP activity through regular brochure updates and public meetings. At least two newsletters per year were delivered to every household within the community. A general meeting was held yearly to review projects, discuss neighbourhood concerns and to seek resident input and endorsement for the following year's activities. As the need arose, individuals were elected to fill vacancies on the Residents' Committee.

Resident involvement in the Program was emphasized not only through the work of the Committee but also in the partnerships that developed between the M/WCRP staff and the community (residents, area groups and organizations), funding agencies, other levels of government, service delivery agents and with other Civic departments. These partnerships contributed to the effective delivery of projects that met the needs of the Glenwood neighbourhood, fostered a better understanding of civic functions and promoted community responsibility and participation. The overall result was an affirWCRP activity through regular brochure updates and public meetings. At least two newsletters per year were delivered to every household within the community. A general

meeting was held yearly to review projects, discuss neighbourhood concerns and to seek resident input and endorsement for the following year's activities. As the need arose, individuals were elected to fill vacancies on the Residents' Committee.

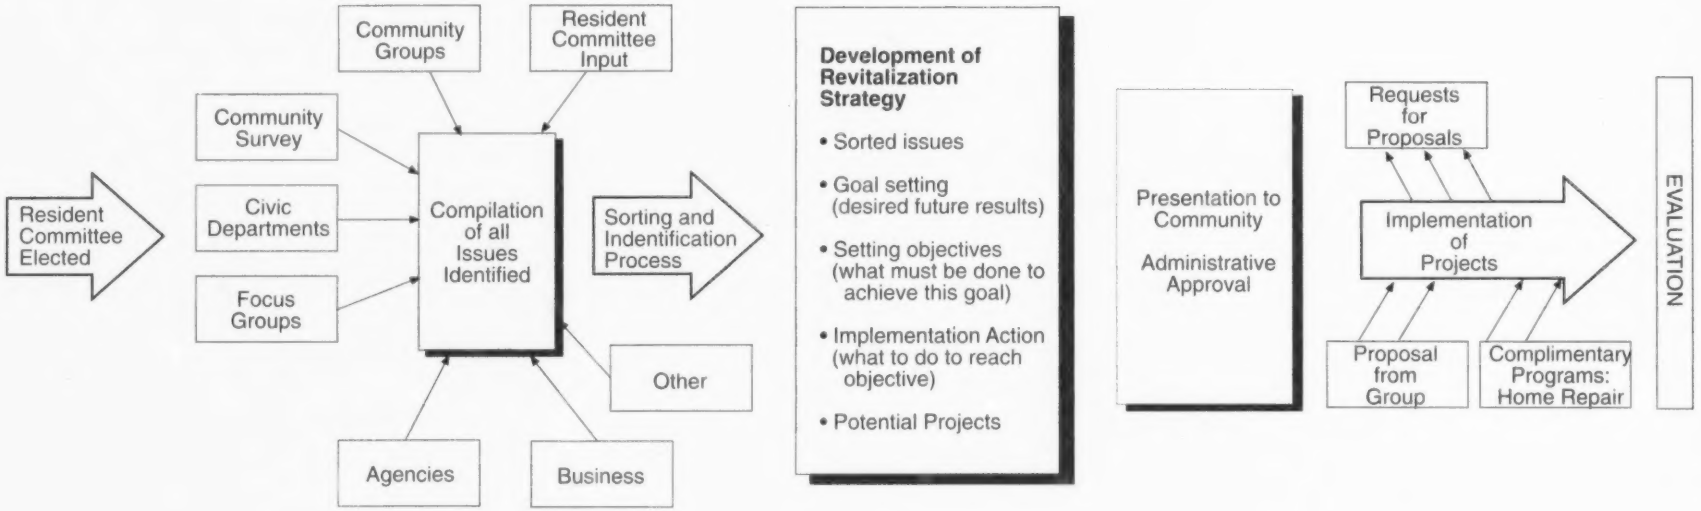
Resident involvement in the Program was emphasized not only through the work of committee:

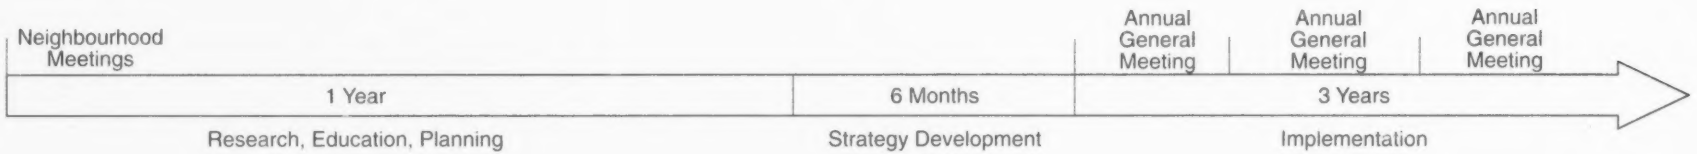
Doris Ames (Chairperson)	Sig Laser
Carol Anderson	Shawn Love
Bill Bell	Joan MacDonald
Bob Bruce	Bev Munn
Julie Ewanchuk	Randy Ptashnick
Jeff Fawley	Julie Thorpe
Jim Fuller	Don Wookey

Others who participated were:
David Beckinsale, Marla DuGuay, Dorothy Hanslip, Dave Gylywoychuk, and Donna Savage

The Committee members were recognized for their valuable contribution to the revitalization of the Glenwood neighbourhood at a reception held in March 1999. At the reception, each Committee member was presented with a plaque by the Minister of Urban Affairs (The Honourable Jack Reimer) and the Mayor of Winnipeg (His Worship Glen Murray).

THE M/WCRP PLANNING PROCESS





Continuous Information Exchange (meetings, newsletters, outreach)

COMMUNITY CONSULTATION

Strategy For Change In Glenwood

At early meetings of the Residents' Committee, members had to balance the development of a set of criteria that was applicable to potential project submissions that were arriving regularly, with the development of a strategic plan for Glenwood. Building upon knowledge from each other, the Committee, working in partnership with Civic staff:

- Collected neighbourhood data
- Identified gaps in services and facilities
- Assessed community resources
- Collaborated with other community groups, civic and provincial departments, agencies and the business community
- Identified issues and concerns affecting Glenwood (the results of the neighbourhood survey)

In the early phase of the revitalization Program, a three stage neighbourhood survey was undertaken (*Stage 1*: Exploratory; *Stage 2*: Issues; *Stage 3*: Options), with every household randomly receiving one of the three surveys. The exploratory survey was hand delivered to 500+ households and contained five open-ended questions. This stage received an 18% response rate. In Stage 2, comments from Stage 1, in addition to information gathered from community groups, civic departments, agencies, etc. were translated into 'issues' items. Using close-ended questions, 500+ different respondents were asked to either agree or disagree with the issue statements, thus helping to rank the most important ones facing the neighbourhood. This second stage received responses from over 50% of those polled. The final stage was based on information gathered from meetings and discussions with community groups and civic departments whereby potential projects were grouped into broad categories (i.e. Safety and Security, Community and Recreation Facilities, Natural Environments, Social and Community Services, Commercial Character, Heritage/History and Residential Character). The 1000+ new respondents were asked to indicate which of the projects they would prefer to see implemented and which ones Program funds should support. A response rate of 52% was achieved.

The results of the surveys formed the basis for intense discussions and the eventual development of a revitalization strategy. The strategy articulated the goals, objectives and implementation

action that could be taken by the Resident's Committee to support local initiatives, alleviate perceived program gaps and address the issues that had been identified by the community.

The Residents' Committee received endorsement for the strategic plan at the March 21, 1995 Annual General Meeting. The Committee then undertook the exercise of prioritizing the implementation actions identified in the plan and recommending funding allocations based upon those priorities.

Project proposals grew out of the strategic plan and from the partnerships that were established among civic staff from other departments, the M/WCRP Residents' Committee, neighbourhood groups and organizations, and the community. In assessing each of the proposals, alternative options to meet the same need were considered as well as resources required such as funding, the creation of partnerships and operating and maintenance issues. The groups making the proposals were required to provide sufficient information (e.g. estimated budget required, project time frame, perceived neighbourhood benefit) in order for the Committee to make an informed decision. City staff worked with project proponents to seek complementary funding from other sources, and M/WCRP "seed money" often provided the basis for levering additional project funds. Details on complementary funding, which totalled more than $1.4 million, are specified later in this report. Generally, the Committee's decision to recommend a funding allocation and the amount of funding were consensual. Every project, regardless of size, received the same degree of attention, as they were all seen as equally important to the proponents of the application and ultimately to the community.

The implementation of some M/WCRP projects involved establishing working groups and creating partnerships (see Project Implementation section) to enable them to proceed. These partnerships were often between local groups, organizations and/or businesses, civic departments, other levels of government, politicians, the private sector, the School Division, the Residents' Committee and the community. The partnerships fostered better understanding of civic functions, promoted community participation and responsibility, and demonstrated support for maintaining and enhancing neighbourhood stability. Through these partnerships, issues prioritized by the community were addressed and financial benefits attained.

Project Funding

	PROJECT	M/WCRP ALLOCATION	COMPLEMENTARY FUNDING
COMMUNITY RECREATION FACILITIES	Glenwood Community Centre	$1,163,620.00	$ 212,000.00
	Glenwood C.C. Arena Project	65,225.00	550,000.00
	Glenwood Athletic Fields	37,700.00	
	Ecole Varennes Grounds	213,330.00	53,365.00
	Glenwood Schoolyard Project	66,200.00	40,000.00
	Morier Park	113,960.00	
	Seine River Riffles/Weirs	33,465.00	25,000.00
	Seine River Interpretative Map	1,500.00	2,000.00
	Seine River Tree Wrap	1,800.00	
	King George Park	33,250.00	
MUNICIPAL SERVICES	Old St. Vital BIZ/St. Mary's Rd Streetscaping	762,790.00	422,110.00
	Special Refuse Pick-ups (1994 & 1996)	4,810.00	
	Tree Planting	62,920.00	
	Curb and Sidewalk Reconstruction	39,030.00	
SOCIAL FACILITIES	Glenlawn Collegiate Institute	4,100.00	145,000.00
	Regents Park United Church	23,600.00	17,000.00
	Scouts Hall - Feasibility Study	5,700.00	
ADMINISTRATION & PLANNING		327,000.00	
RESIDENT PARTICIPATION		40,000.00	
	TOTAL	$3,000,000.00	$1,466,475.00

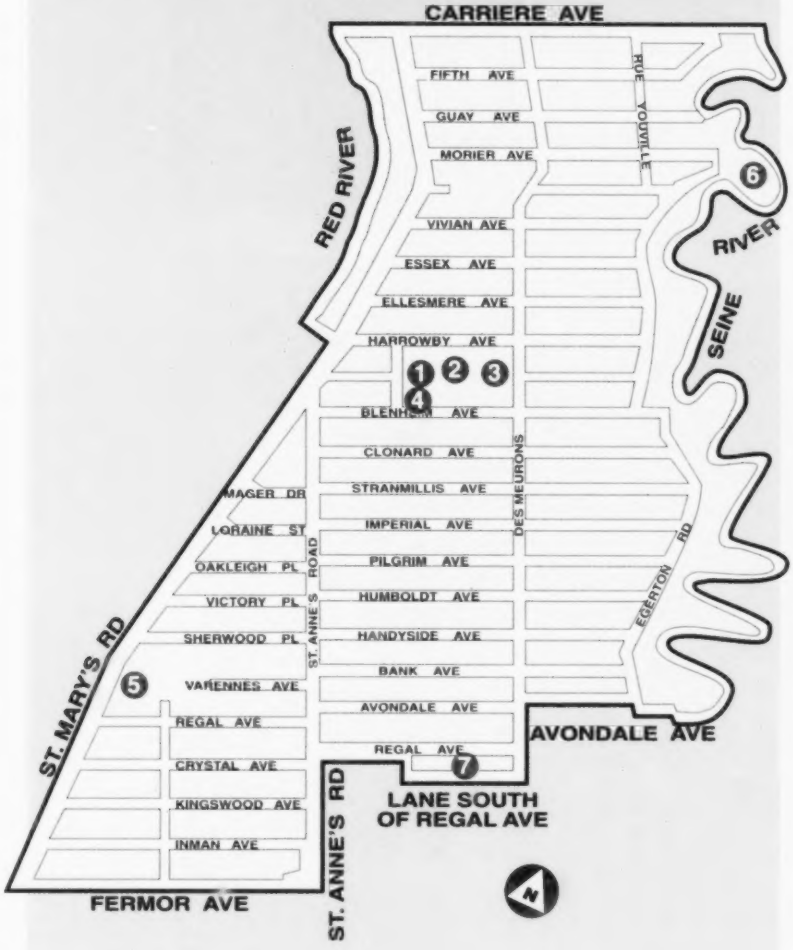
GRAND TOTAL $4,466,475.00

Project Implementation

The tables in this section represent the projects undertaken in the Glenwood neighbourhood through the Manitoba/Winnipeg Community Revitalization Program (M/WCRP) in response to the objectives set out in the Glenwood Community Revitalization Strategy document.

Each of the projects is identified by category and a brief description is provided. The issues and goals identified in the strategy that were applicable to the individual project are referenced. Partnerships with other civic departments, other levels of government and with community agencies and organizations provided an avenue for residents of Glenwood to deal with the issues and goals identified in the strategy.

Partnership refers to the proponents and participants involved in making the project a reality, including those who provided complementary funding for the project. Without these partnerships, the goals of the strategic plan would not have been achieved and projects would not have been implemented as successfully, nor with such an impact on the community. These partnerships have enabled residents to access resources and services and equipped them with the tools to continue the revitalization process beyond the term of the M/WCRP in Glenwood.



Community/Recreation Facilities

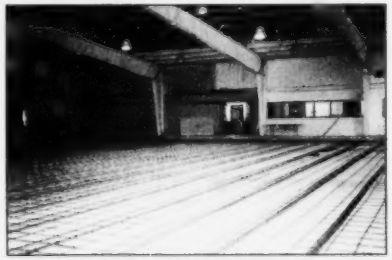
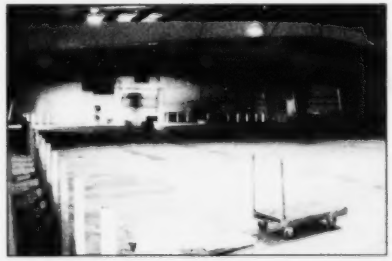
■ Community/Recreation Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
GLENWOOD COMMUNITY CENTRE BUILDING (Phase 1)	Demolition of the old community centre as well as the 4th Winnipeg Scouts Hall and construction of a new facility (see Scouts feasibility study under *Social Facilities)*, with dedicated space for the 4th Winnipeg Scouts, attached to the existing arena structure. Floor replacement in the arena to accommodate installation of a future ice plant. Acoustic sound treatment in the gym. Construction of a parking lot and site landscaping.	Provide opportunity for stronger and more viable community-based facilities. Improve condition of neighbourhood facilities. Meet the recreational needs of the community. Enhance use of facilities by local residents.	M/WCRP, Glenwood Community Centre, 4th Winnipeg Boy Scouts, Scouts Canada, area residents, City of Winnipeg Planning, Property & Development and Community Services Departments, Manitoba Community Places Program, Thomas Design Builders	Improved community facilities. Increased access to and opportunities for neighbourhood youth, families & seniors. Addressed program needs of the community.

GLENWOOD COMMUNITY CENTRE ARENA (Phase 2)	Interior building renovations and roof modifications to the existing arena as well as installation of an ice plant and new tempered glass for improved spectator viewing.	Improve quantity, quality, condition and utilization of community and recreation facilities. Promote the highest quality programmed and passive community and recreation facilities.	M/WCRP, Glenwood Community Centre, Riel Community Committee, Councillor Golden, City of Winnipeg Community Services and Public Works Departments, Cadillac Plastic, Thomas Design Builders	Upgraded and renovated existing facilities to maximize utilization.





■ Community/Recreation Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
GLENWOOD ATHLETIC FIELDS	Upgrading of athletic fields (located behind Glenwood C.C./ Glenwood School), including replacement of existing fencing, tree planting, repairs to bleachers and backstops, as well as corrective measures to address drainage problems.	Improve quantity, quality, condition and utilization of community and recreation facilities. Promote the highest quality programmed and passive community and recreation facilities.	M/WCRP, Glenwood Community Centre, City of Winnipeg Community Services, Planning, Property & Development and Public Works Departments, St. Vital School Division	Upgraded existing facilities to maximize utilization.

GLENWOOD SCHOOL GROUNDS	Redevelopment of the front grounds of Glenwood School including installation of a new playstructure, landscaping, as well as lighting and fencing to address safety concerns.	Improve quantity, quality, condition and utilization of community and recreation facilities. Promote the highest quality programmed and passive community and recreation facilities.	M/WCRP, Glenwood Home & School Association, St.Vital School Division, Manitoba Community Places Program, Spear Supply Ltd.	Enhanced usage of existing facilities. Improved safety through the installation of site lighting. Upgraded existing facilities.

■ Community/Recreation Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
ECOLE VARENNES GROUNDS	Installation of a new playstructure, swings, basketball standards, baseball backstop, picnic tables, benches and waste receptacles, sand volleyball court, soccer goal posts as well as site grading, sodding, asphalting, tree planting and safety lighting.	Improve quantity, quality, condition and utilization of community and recreation facilities. Promote the highest quality programmed and passive community and recreation facilities.	MWCRP, Ecole Varennes Parent Council, area residents, St.Vital School Division, Manitoba Community Services Council, Manitoba Community Places Program, Sustainable Development Innovations Fund, Manitoba Hydro, Hilderman, Thomas, Frank & Cram Consultants, Bird Construction	Expanded utilization of an existing neighbourhood facility. Improved safety through the installation of site lighting. Upgraded existing facilities.

MORIER PARK	In consultation with area residents and the Save Our Seine River organization this park was redeveloped while keeping the balance of natural elements and the lower level open area maintained. Components included site grading, entrance enhancements, as well as installation of a new playstructure and swings, park furnishings, lighting, fencing and signage.	Improve quantity, quality, condition and utilization of community and recreation facilities. Promote the highest quality programmed and passive community and recreation facilities.	M/WCRP, area residents, Save Our Seine River Environment Inc., City of Winnipeg Public Works and Planning, Property & Development Departments, David Wagner Associates Inc., McEwen Bros. Ltd. Landscaping Contractors	Supported sustainable park development. Maximized use of existing space/ facilities. Targeted needs of specific groups within the community. Improved safety through the installation of site lighting.

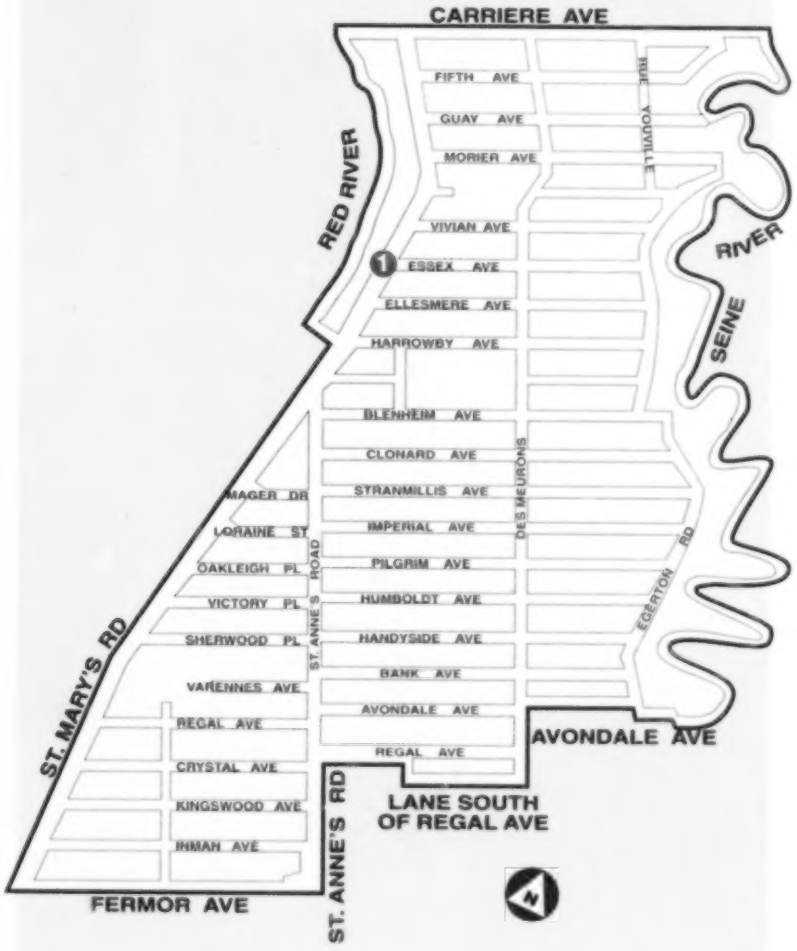
■ Community/Recreation Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
KING GEORGE PARK	Playground amenity upgrades and park enhancements.	Improve condition of existing parks, playgrounds, Meet the recreation needs of the community. Address safety issues. Enhance use by local residents.	M/WCRP, City of Winnipeg Planning, Property & Development and Public Works Departments	Supported sustainable park development. Maximized use of existing space/ facilities. Targeted needs of specific groups within the community.

SEINE RIVER TREE WRAP	In partnership with the Save Our Seine organization, over 600 trees along the Seine River were wrapped with stucco wire to prevent beaver damage. M/ WCRP provided funding to cover the cost of the material.	Support development and maintenance decisions that are sensitive to natural physical features as a public neighbourhood resource for the future. Promote utilization of river environments.	M/WCRP, Save Our Seine River Environment Inc., Urban Green Team	Widened community awareness and input into active and intrinsic natural components of the neighbourhood as an aesthetic natural asset, as well as a recreational and educational resource.

■ Community/Recreation Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
SEINE RIVER RIFFLES/WEIRS	This project included the surveying, engineering and construction of 3 riffle structures (of a proposed total of fifteen along the Seine River). Construction of the riffles will help maintain a healthier level of water, thereby improving its quality, enhancing aesthetics, aquatic habitat and recreational qualities and reducing riverbank erosion.	Preservation, restoration, protection and enhancement of the area's natural environments. Support development and maintenance decisions that are sensitive to natural physical features as a public neighbourhood resource for the future.	M/WCRP, Save Our Seine River Environment Inc., City of Winnipeg Planning, Property and Development Department, Province of Manitoba's Natural Resources Department – Fisheries Branch	Widened community awareness of the active and intrinsic natural components in the neighbourhood as an aesthetic natural asset and recreational resource. Promoted community utilization of river environments.
SEINE RIVER INTERPRETATIVE MAP	'Seed funding' was provided to the Save Our Seine organization for the research, design and development of an interpretative map of the Seine River Corridor.	Preservation, restoration, protection and enhancement of natural or undeveloped environments. Support development and maintenance decisions that are sensitive to natural physical features as a public neighbourhood resource for the future.	M/WCRP, Save Our Seine River Environment Inc., Ducks Unlimited, Le College de Saint-Boniface	Enhanced community awareness of the natural components in the neighbourhood that are an aesthetic natural asset as well as a recreation and educational resource. Promoted community utilization of river environments.



Municipal Services

2. Special Refuse Pickups*
3. Tree Planting*
4. Curb and Sidewalk Reconstruction*

*Neighbourhood Wide Project

■ MUNICIPAL SERVICES

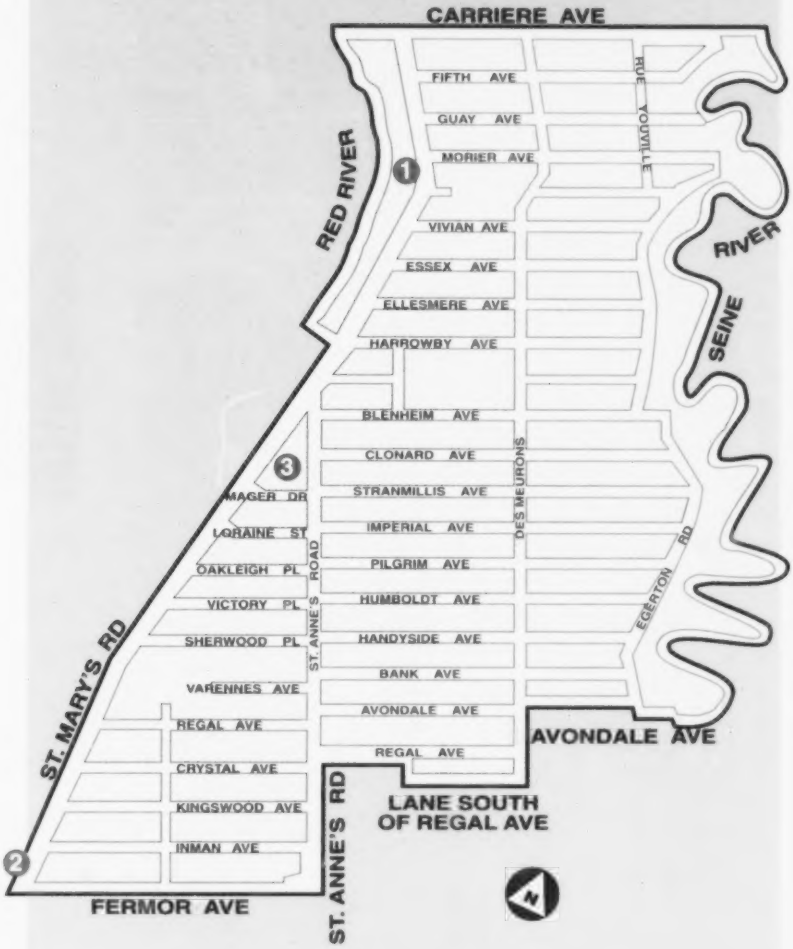
PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
OLD ST. VITAL BIZ/ ST. MARY'S ROAD STREETSCAPING	The major components of this project included construction of an overlook with a replicated "Welcome Arch" which once spanned St. Mary's Road, sidewalk widening, an information kiosk, banners, tree planting, hanging baskets, pedestrian and safety lighting, window boxes, and a riverbank trail. Other components involved providing funding for a joint BIZ/St.Vital Historical Society initiative for the research and development of historical plaques displayed throughout the area and at the overlook.	Redevelopment of specific sites for public use with significant visual and physical appeal, identifiable as a neighbourhood landmark. Enhancement of the general physical presentation of commercial activity in the neighbourhood. Improve the condition of existing street elements.	M/WCRP, Old St.Vital BIZ, City of Winnipeg's Public Works and Planning, Property & Development Departments, Federal WDA Programs 14 (Strategic Initiatives) and 13B (Heritage Canada) and Provincial WDA Program 12A (Riverbank Development), St.Vital Historical Society, Hilderman, Thomas, Frank & Cram Consultants, M D Steele Construction Ltd.	Created an identifiable neighbourhood landmark that has significant visual and physical appeal. Enhanced the physical presentation of businesses in the neighbourhood. Increased public safety through the improvement of street elements.

Municipal Services

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
SPECIAL REFUSE PICK-UPS	Two special refuse pick-ups, as well as a hazardous waste drop off organized in conjunction with the Seine River's fall clean-up campaign and the Clean Up Winnipeg Day.	To promote awareness of individual property owners that the value and respect for property and the neighbourhood in general is reflected in and is in part a result of the physical presentation of their property.	M/WCRP, City of Winnipeg Water and Waste Department, Manitoba Hazardous Waste Corporation, Glenwood residents	Promoted the clean up of existing homes and yards. Instilled pride in the neighbourhood through the efforts of individual residents and property owners.
TREE PLANTING	More than 300 boulevard trees were planted throughout the Glenwood neighbourhood during the spring and fall of 1996.	Residential street enhancement to encourage continued pride of home ownership. Pride and identification with neighbourhood character and individual residential property is influenced by public elements such as boulevard landscaping and trees.	M/WCRP, City of Winnipeg Public Works (Forestry Branch) Department	Preserved boulevard trees, with specific emphasis on maintaining the treed nature of the community. Upgraded residential streetscape elements to encourage continued individual pride of ownership.

Municipal Services

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
CURB & SIDEWALK RECONSTRUCTION	Installation of 32 paracurbs and repair to more than two thousand feet of sidewalk throughout the Glenwood neighbourhood.	Improve surface conditions for the safety and accessibility of pedestrians throughout the neighbourhood. Enhance the level, condition and utilization of fundamental public service amenities.	M/WCRP, City of Winnipeg Public Works Department	Improved pedestrian safety, accessibility and mobility throughout the neighbourhood.



Social Facilities

1. 4th Winnipeg Scouts Hall — Feasibility Study
2. Glenlawn Collegiate Institute
3. Regents Park United Church

Social Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
4TH WINNIPEG BOY SCOUTS – FEASIBILITY STUDY	Structural and geo-technical assessments, drawings and cost estimates for building renovations including wheelchair access and roof stabilization. The evaluation revealed that it was not feasible to upgrade the facility, so the building was demolished and space constructed for this program as part of the new Glenwood Community Centre.	Availability of programs and resources for families. To encourage, extend and broaden programs and services for children, youth, families and individuals in the community.	MWCRP, 4th Winnipeg Boy Scouts, Scouts Canada, Dyregrov Consultants, Wolfrom Engineering, Synyshyn Architecture	Encouraged activity in the area of family support services located or locating in the neighbourhood. Augmented services for youth.
GLENLAWN COLLEGIATE INSTITUTE	Funding provided towards purchase of retractable seating for the new Performing Arts Theatre.	To encourage, extend and broaden programs and services for the youth, families and individuals in the community.	M/WCRP, Glenlawn Alumni Association, St.Vital School Division	Encouraged youth activities in the neighbourhood. Augmented facilities for school and community programs.

Social Facilities

PROJECT NAME	PROJECT DESCRIPTION	ISSUES & GOALS	PARTNERSHIPS	OBJECTIVES MET (COMMUNITY BENEFIT)
REGENTS PARK UNITED CHURCH	Installation of a fire alarm system. Construction of a warm-up kitchen in the basement as well as washroom renovations on the lower level.	Maximize utilization of facilities. Enhance seniors lifestyle through the availability of facilities, services and programs in the neighbourhood.	M/WCRP, Regents Park United Church, Age & Opportunity St. Vital Seniors Centre, St. Vital Montessori School	Enhanced available program space in the neighbourhood. Augmented services for seniors.
